Localhost: Code Collaboration with GitHub

🕐 **Saturday March 13, 2021**
5:00PM EST

📍 Event is hosted online

Log In & Register

Event Description

Welcome to MLH Localhost

Localhost is a great way to build your tech skills and hang out with the hacker community. If you'd like to attend the workshop all you need to do is register on this page and check the page again an hour before the event begins. You'll find the link to the Zoom as well as a bunch of resources for the workshop!

This workshop will cover a basic and critical skill for developers: how to collaborate. It will cover critical tools like version control, Git, and GitHub. It also will cover a basic terminology and best practices.

Powered by GitHub

The GitHub platform is an incredibly powerful collaboration tool. Anyone can collaborate on projects using GitHub! In this workshop, participants will create an account, become familiar with the GitHub platform, and use a best practice collaboration workflow to add their hometown to a map of all Localhost participants!

Set up Git locally

Many developers choose to use Git locally on their own computers. Once participants have had the chance to edit the project in the browser, they'll learn how to do the same thing to a project locally.

Requirements / Prerequisites

Participants will need to be able to create a GitHub account. This workshop can be completed entirely in the browser. No background knowledge is necessary.

The latest version of Google Chrome is the preferred browser for this workshop.

Who can attend?

Locations have different requirements for who can attend. This location is open to the following:

Working Professionals
Students - University
Students - Secondary/High School
Students - Other

Schedule

17:00 to 17:30 -> Overview of MLH, GitHub, and Workshop Objectives
17:30 to 18:00 -> GitHub Account Registration and Set Up
18:00 to 19:30 -> Localhost: Code Collaboration with GitHub
19:30 to 20:00 -> Wrap-Up
20:00 to TBD* -> Q&A, Troubleshooting, & Additional Guidance

From Per Scholas AWS re/Start

At Per Scholas, we believe a thriving workforce starts with equitable access to education. By providing skills training and access to employer networks to individuals often excluded from tech careers, Per Scholas envisions a technology workforce as diverse as the customers it serves. Over 11,000 graduates have launched successful careers in tech to date through our no-cost technical training. Our mission is to advance economic equity through rigorous training for tech careers, and to connect skilled talent to leading businesses.
